

STANDING GUARD AGAINST HAZARDOUS CHLORINE LEAKS

Pure Air Filtration's Sentry™ Emergency Gas Dry Scrubber is the best line of defense against hazardous chlorine leaks at water treatment facilities. With only one moving part, the Sentry™ is safer and more reliable than old fashioned wet scrubber systems, requires less maintenance, is easier to operate, and costs less.

The Sentry™ is filled with our special UL rated Safetyorb™ gas adsorbent pellets that turn dangerous chlorine into harmless salts, which can be safely disposed of in any landfill.

PureAir Filtration

Guards Against Leaks: Improves EPA Risk Management Rating

In case of a toxic chlorine leak, you can't afford to be without the protection of a Sentry™ with Safetysorb™. A sudden leak can endanger lives and result in serious legal issues.

Even small leaks can cause nausea, severe eye and respiratory tract irritation, coughing, sneezing and choking. Larger toxic releases can result in burns, respiratory collapse, even death. Not to mention potential damage to equipment.

Leaks can occur for many reasons when you least expect them from equipment failure, accidents, or even destruction caused by a security breach. Don't be sorry, be safe with the Sentry™.

Why The Sentry™?

In case of a leak, the Sentry™ springs into action, capturing escaping chlorine gas before it puts unsuspecting employees and citizens at risk. And unlike outdated wet scrubbers that require constant upkeep and handling of caustic solutions, the Sentry™ is safe, reliable and dependable.

The Sentry™ offers a one year free warranty on materials, a low cost 10 year extended warranty and free annual lab testing of its gas adsorbent media. Installation can take as little as three days and systems can be customized to meet your needs.

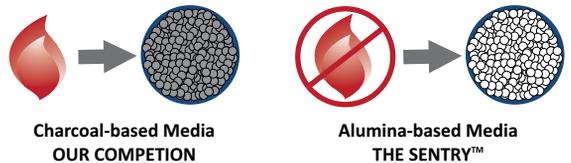

Which of these do YOU want to depend on in an emergency?

The Sentry™ Components	Wet Scrubber Components
✓ Vessel	✓ Vessel
✓ Non-toxic Adsorbent Media	✓ Blower
✓ Blower	Pumps
	Lines
	Nozzles
	Valves
	Holding Tanks for Caustic Liquid

✓ = low-maintenance or zero-maintenance components

UL's Highest Rating

Unlike our competitor's charcoal-based media, the Sentry's Safetysorb™ gas adsorbent media is alumina-based so it's fireproof, earning it Underwriter Laboratory's coveted "Class 1" rating.
