Inchannel Screen

WSG & Solutions, Inc. is a major supplier of in channel screens for the municipal and industrial markets. Our units are ruggedly designed for ease of maintenance and versatility.

Our units incorporate a variety of screen types, including punched, drilled and Johnson screens. The screens incorporate a high strength shaftless screw, full length, with replaceable stainless steel sectional flights and brushes at the inlet. The shaftless technology eliminates clogging. Three cleaning zones help wash the material as well as keeping the tube clean. A compaction zone at the end cuts down on the volume of material by 50%.

Features and Benefits

- Design Limits: Flows to 7 MGD
